Career Path

I am continuously enhancing my skills to advance my career as a **Professional Full-Stack Java Developer**.

Achievements

🏆 Effort Award - System EXE Company
Received Effort Award for outstanding individual performance in the Manufacturing System (Maintenance) project.

Quyen Nguyen
Software Engineer

Professional Summary

Experienced Java Software Engineer with 5+ years of experience in backend and full-stack development. Focused on Insurance, Manufacturing, and Payment systems. Skilled in Java, Spring Boot, Microservices, and Docker.

Work Experience

🏢 CSC / DXC Technology Vietnam — Associate Software Engineer
📅 2016 – 2/2018 | 💼 Insurance Systems (Integral)

- Resolved UI and functional issues in the Integral project, improving system stability.
- Enhanced batch jobs for data extraction and financial document generation (Receipts, Payments, Direct Journals) on a COBOL-to-Java migrated framework.
- Authored Technical Specification Documents (TSDs) for key modules.
- Collaborated with the XML Team to implement data extraction and generate BSIB Group & Policy XML reports.

🔧 Tech Stack: Java, Spring Framework, JSP/Servlet, Hibernate, SQL Server

🏢 System EXE Vietnam — Java Developer
📅 6/2018 – 12/2019 | 💼 Manufacturing Management System

- Resolved UI and functional issues to ensure system stability.
- Developed new features based on user requirements and BrSE task assignments.
- Supported cross-country collaboration by translating technical documents (VN/JP → EN) for the Myanmar team.
- Optimized SQL queries, improving overall system performance.

🔧 Tech Stack: Java, PostgreSQL, Tomcat, SVN, Git, Flex

🏢 T2P Travel2Pay (Germany) — Java Developer
📅 1/2022 – 12/2023 | 💼 Travel & Payment Management

- Developed new modules for budgeting and expense tracking.
- Developed new features based on user requirements and requests from the Business Analyst (Product Owner, Germany).

🔧 Tech Stack: Java, Spring boot, Microservices, VueJS, MySQL, Docker

🏢 System EXE Vietnam — Middle Java Developer
📅 1/2022 – 12/2023 | 💼 Manufacturing System (Maintenance)

- Resolved UI and functional issues to ensure system stability.
- Developed new features based on user requirements.
- Optimized SQL queries, improving overall system performance.
- Led 3-members in 3-month upgrade project (100% milestones achieved).
- Redesigned production modules and optimized code.

🔧 Tech Stack: Java, Spring Framework, Angular, PostgreSQL, Git

🗓️ Freelance Projects
📅 2024 – 2025

- **Trieu Thanh Milk Tea** – Created brand identity (logo, uniform) with strong client feedback.
  https://github.com/YuNguyen/design_doc/tree/main/TrieuThanh_MilkTea
- **Nafaco Company** – Proposed Microsoft Azure Blob Storage solution for the design team, highly appreciated by the client.
